# MARCIAL RICO POZAS

SOFTWARE ENGINEERING. UNDERGRADUATE.

I am a Software Engineering student looking for new opportunities to acquire new skills. I am experienced in working with groups of people since teamwork is essential to reach peak efficiency. I am always open to feedback and ready to learn and listen.

PROJECTS

Projects made at Unisersity of Oviedo

At university I have done a variety of projects including the following:
- Unreal Engine game developement.
- VR games developed with Unity.
- AR app for Android developed with Unity + Vuforia
- Instant messaging app made with Node Js, HTML and cloud based databases
- Decentralized route creation and managment app developed with React and SOLID
- Various personal projects deployed in the cloud devloped with React JS and other technologies.
- Projects developed using agile methodologies.
